Jumping

Take-off – technique and body position to take-off for a jump

Flight – controlling the body in the air to maximize height/distance

Landing – how to land safely and effectively absorb impact

Throwing

Preparation – finding an appropriate position from which to initiate a throw

Building momentum – how to use your legs to help build momentum

Delivery – proper sequencing and weight transfer to deliver maximum force and accuracy with a throw

Follow Through & Recovery – how to effectively complete throwing movement and weight transfer

The Spartans' Summer Camp program is based on recommendations made by the Run Jump Throw Wheel program. Run Jump Throw Wheel is a national program developed by Athletics Canada that teaches fundamental movement skills and develops physical literacy. Using track and field inspired games, activities and skill challenges lead by instructors specifically trained to teach the fundamentals of running, jumping, and throwing.

All activities are designed to teach fundamental movement skills using developmentally appropriate progressions to introduce and develop skills, with skill consolidation done through games and skill challenges.
